-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 12 May 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

### DETAILED ACTION

Amendment received 5/12/08 was entered into the record.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Takatoshi et al. US 5,755,434. Takatoshi et al discloses a bottom removal type paper supply apparatus having:

a paper support base (2) on which paper is stacked located at a bottom part of the bottom removal type paper supply apparatus;

force applying means (40) for applying pressure on the paper stacked on the paper support base;

a first pickup roller (51) provided at an end portion of the paper support base on a side toward a body of the bottom removal type paper supply apparatus and which picks a paper sheet from the paper stacked on the paper support base from the bottom and transports the paper sheet into the bottom removal type paper supply apparatus;

a second pickup roller (21) provided at a central portion of the paper support base and selectively assisting the first pickup roller to transport the paper sheet into the bottom removal type paper supply apparatus; and

a shutter (60) switchable between an open state in which the paper is in contact with the second pickup roller, and a closed state in which the shutter prevents contact between the paper and the second pickup roller, the shutter being provided on the second pickup roller (Column 5, lines 13-40), wherein

the shutter may be switched in the open state to use a paper transport force of the second pickup roller in addition to a paper transport force of the first pickup roller only when a prescribed weight or a prescribed number of sheets of paper are stacked on the paper support base, and the shutter may be switched in a closed state otherwise, to use only the paper transport force of the first pickup roller.

The pressure applied to the paper by the force applying means can be adjusted, including as explained from column 3, line 64 to column 4, line 28.

The shutter may be switched between the open and closed states based on sensing the stack weight or a pickup miss of the first pickup roller.

### ***Response to Arguments***

Applicant's arguments filed 5/12/08 have been fully considered but they are not persuasive. The amended claims provide a great amount of intended use of the claimed apparatus. The apparatus of Takatoshi et al. anticipates all of the components of the claimed apparatus and may be similarly used in a manner as desired and is claimed.

A claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" if the prior art apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987). See MPEP 2114.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
